STUDENT REPORT

DETAILS

Name

Ganesh B

Roll Number

3BR23EE028

EXPERIMENT

Title

SIGNATURE FOR LCM

Description

Given two numbers a and b. Find the GCD and LCM of and b.

Input:

• Two positive integers a and b (1 <=a, b <=1000)

Output:

For GCD function, an integer representing the GCD of a 'and b

For LCM function, an integer representing the LCM of a and b

Sample Input:

12 18

Output:

6

36

Explanation:

The GCD of 12 and 18 is 6. The LCM of 12 and 18 is 36.

Source Code:

```python
def gcd(a, b):
    while b:
        a, b = b, a % b
    return a
def lcm(a, b):
    return abs(a * b) // gcd(a, b)

# Example usage
if __name__ == "__main__":
    import sys
    a, b = map(int, sys.stdin.readline().strip().split())
    result_gcd = gcd(a, b)
    result_lcm = lcm(a, b)
    print(result_gcd)
    print(result_lcm)
```

RESULT

5 / 5 Test Cases Passed | 100 %
